Projects Portfolio

Férias & Co.

As a Full stack Software Engineer in 2019/2020

Booking platform

www.ferias.co **(Institutional landing page)**

Férias & Co. is a company in the tourism and corporate benefit sector. The worker's travel platform.

They provide access, planning and quality of life to employees involving their friends and family when they go on vacation, through a partnership with companies.

In this project I:

● Developed robust and mobile first web applications using Angular and other related technologies.

● Developed robust and scalable back-end applications using Node.js (Express, GraphQL), MongoDB, AWS, Serverless Framework.

● Responsible for javascript code reviews, front-end style guide, patterns and team code quality.

● Provide knowledge transfer sessions among the team.

● Mentor for new team members as part of their onboarding process.

D+ Valor (Duratex)

As a Full stack Software Engineer in 2018/2019

Technologies: Angular 4, Node.js, Mongoose, AWS infrastructure.

Duratex's volunteer social media platform, where employees can participate in volunteer events, publish photos and texts about their actions and even promote events. The idea is to influence people to engage more with causes of social vulnerability, helping us to build a better world.

In this project I made some interfaces of the site, but I also worked in the development of the back end, with unit and integrated tests.

Conectados App (Duratex)

As a Full stack Software Engineer in 2017/2018

Technologies: Ionic 3, Angular 4, Typescript, Node.js, .NET, SQL Server.

Conectados app is Duratex's social media developed to connect **more than 10,000 employees**, which people can have access to company news, photos and videos of our processes, practices and employee's daily actions.

In 2018, **the project received an award from the Brazilian Business Communication Association** (ABERJE), as one of the highlights in the Digital Media category.

My role was in the development of the App and website interfaces where administrators manage the content of the app, as well as in the logic in the back end of the product.
